20 REASONS why insects will be staple of our diet in 10 YEARS

YOU WON'T KNOW IT'S THERE
Insects can be milled into a powder with neutral taste and added to various meals to improve their nutritional values.

A PART OF THE FINE DINING WORLD
Some michelin star restaurants are offering insects as part of their menus.

WE ARE MORE AND MORE OPEN MINDED
Westerners fear insects as they did SUSHI in the 1970s, or even lobster, who are really just giant insects that were regarded as inferior and repulsive.

ALREADY A PART OF OUR DIETS
As various food contains legally allowed number of insects, the average westerner already consumes about 1 kg of insects every year.

INSECTS CAN UPLIFT DEVELOPING COUNTRIES
Insect harvesting offer low-tech and low-capital opportunity of livelihood to even the poorest countries often to disadvantaged women.

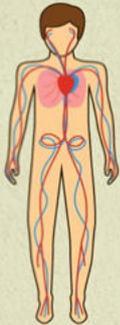

MORE POPULAR THAN ONE MIGHT THINK
It is estimated that insects form part of the traditional diet of at least 2 billion people.

THE BEST PROTEIN FOR HUMAN BODY
In many ways, a meat protein is superior to protein from plants. The meat protein is, however, in the same quality as protein from insects.

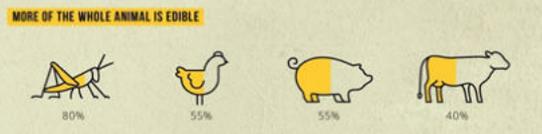

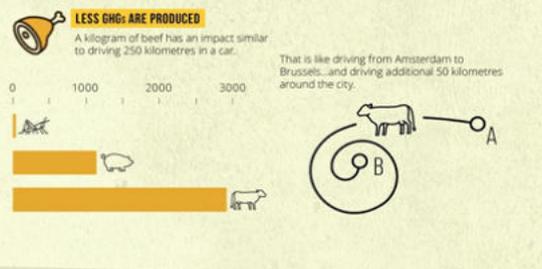

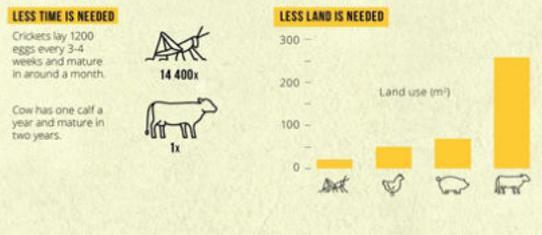

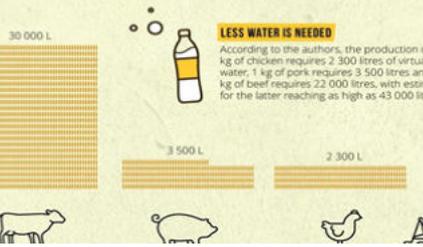

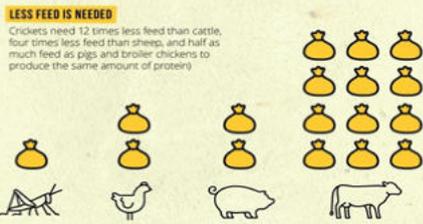

THE HEALTH BENEFITS ARE ENDLESS
Many insects contain good and healthy fats. They are also rich in calcium, iron and zinc.

SAFER TO EAT THAN LIVESTOCK
We are similar enough to our livestock to be able to catch their diseases. However, insects have a much lower risk of passing disease on to us.

NO NEED FOR ANTIBIOTICS
Overuse of antibiotics for livestock is no joke. Fortunately, no antibiotics are used for raising insects, thus, reduced risk of super bacteria.

TO PRODUCE THE SAME AMOUNT OF PROTEIN:

INSECTS CAN EAT WHAT WOULD BE NORMALLY WASTED
Insects can be fed on organic waste streams. (Insects can eat feed what would be normally thrown out as a waste)

LESS KILLING OF INTELLIGENT BEINGS
Pigs are similar to dogs, chimpanzees, or even 3 year old children in terms of intelligence. However, 44 pigs are killed every second in the world.

SATISFYING ANIMAL WELFARE OF INSECTS
Insects are usually used to living in dense population. Moreover, their central neural system is so simple, that insects almost certainly do not feel pain.

A HUMANE WAY TO KILL
For example, crickets are before harvesting frozen and put into hibernation, which mimics diapause, their natural phase of sleeping.

So brace yourself
MORE THAN 1900 SPECIES
of known edible insects waiting!

 Bienvenue dans **Thunderbird**

Faites un don à Thunderbird

Thunderbird domine le marché de la messagerie électronique et des agendas open source, multiplateforme et gratuits pour les particuliers et les professionnels. Nous souhaitons assurer son existence et continuer de l'améliorer.

Si vous appréciez Thunderbird, nous vous encourageons à faire un don ! En faisant un don, vous nous aidez à continuer de proposer un super client de messagerie dépourvu de publicités. [Faites un don »](#)

Autres façons de participer à Thunderbird

Le moment est donc parfait pour commencer à participer : en écrivant du code, en testant, en aidant les utilisateurs, en traduisant... Rejoignez notre communauté mondiale de développeurs et de contributeurs.

Pourquoi avons-nous besoin de dons ?

Vous savez peut-être déjà que les améliorations de Thunderbird ne sont plus financées par Mozilla. Heureusement, une communauté active continue de le maintenir et poursuit son développement. Cependant, pour que le projet survive à long terme, il nécessite un financement.

Thunderbird est en train de devenir une organisation indépendante. En devenant indépendants, nous pourrions contrôler entièrement notre futur, cependant une infrastructure importante doit être maintenue pour livrer l'application à nos dizaines de millions d'utilisateurs. Pour que Thunderbird survive et continue d'évoluer, nous avons besoin de votre soutien et nous vous demandons aujourd'hui de faire un don. L'ensemble des fonds recoltés servira à financer le développement de Thunderbird et de son infrastructure.

XI/ Exemple de mail envoyé aux blogueurs français

Bonjour Leona,

Merci beaucoup pour votre réponse positive !

Nous avons travaillé 24/7 sur nos barres. Cela nous fait plaisir que vous êtes intéressée! Nous travaillons sur la production d'échantillons, sur les emballages, etc... Nous avons l'intention de vous envoyer ceci pour la semaine du 27 juin !

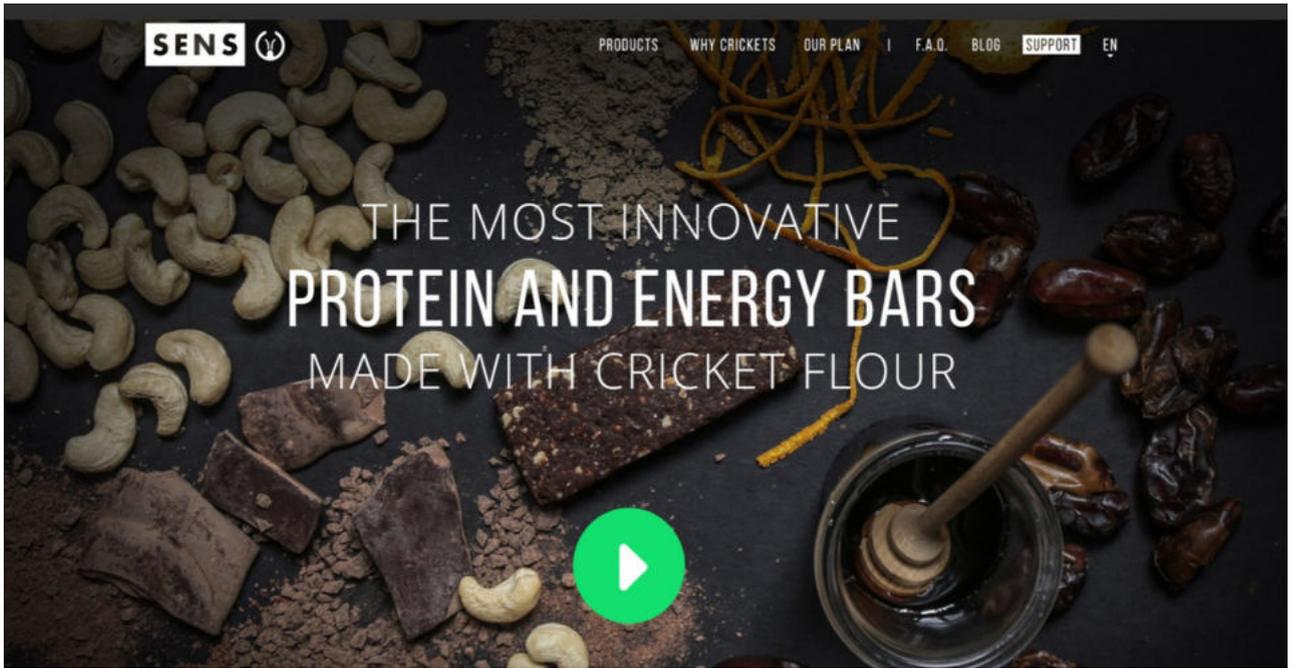

Pendant ce temps, vous pouvez regarder les photos des barres. Je vous envoie une photo avec nos 4 parfums et les ingrédients. Vous pouvez vous attendre à des barres énergétiques "chocolat noir & orange", "ananas & noix de coco". Et des barres protéinées "chocolat noir & sésame", "beurre de cacahuète & cannelle".

Cordialement
